tb1x0.py

```python
# Python: Concepts of if-else statements
x = 10

# Example of if statement
if x > 0:
    print("x is positive")

# Example of if-else statement
if x % 2 == 0:
    print("x is even")
else:
    print("x is odd")

# Example of nested if-else statement
if x > 0:
    if x % 2 == 0:
        print("x is a positive even number")
    else:
        print("x is a positive odd number")
else:
    print("x is not a positive number")
```
