

tb1x0.py

```
1 # Python OOP - Encapsulation
2 class MyClass:
3     def __init__(self, x):
4         self.__x = x # Private attribute
5
6     def display(self):
7         print(self.__x)
8
9
10 obj = MyClass(5)
11 obj.display() # Output: 5
12 # obj.__x # This would result in an AttributeError
13
```
